TONY HOYIN LIU
SOFTWARE ENGINEER

tonyhoyinliu@gmail.com — (650) 302 7733 — Portfolio | Github | LinkedIn

PROJECTS

SIDELINE : Sole Developer   **LIVE | GITHUB**
Platform that enables users to share and blog sports news and retrieve the latest new around the leagues

- Single-page full-stack application built using RESTful Ruby backend and React front end.
- Utilizes React-Flux's unidirectional data flow architecture; in turn, updates React components via asynchronous jQuery requests for seamless UX
- Features debounce for search functions to eliminate unnecessary requests
- Implemented cloud-hosting of images and media on AWS and Cloudinary

PCBA : Sole Developer   **LIVE | GITHUB**
Peninsula Chinese Business Association's official site

- Hosted on Amazon Web Services and features APIs such as Commingly calendar, Shutterfly photo album, Cognito forms, and Google Maps
- Customized and designed responsive site-wide CSS for smoother UI & UX

THE ENDORSER : Sole Developer   **LIVE | GITHUB**
5-star Chrome Extension used on LinkedIn website for easy endorsements of skills

- Designed and implemented using JavaScript to establish modularity
- Parses webpages to show CSS styles via jQuery event handlers

GOAL : Front End Engineer   **LIVE | GITHUB**
2D HTML-Canvas sports game using vanilla JavaScript

- Features velocity algorithm and physics calculations upon paddle collision
- Integrated algorithm for AI to react accordingly to the ball movement

SKILLS

Ruby   Ruby on Rails   JavaScript   React / Flux & Redux   React Native   TDD
HTML   CSS   jQuery   SQL / PostgreSQL   Amazon Web Services (AWS)
